Security recommendations 2

⚠ Add MFA for root user

Enable multi-factor authentication (MFA) for the root user to improve security for this account.

⚠ Add MFA for yourself

Add multi-factor authentication (MFA) for yourself to improve security for this account.

Add MFA

✔ Your user, assignment1, does not have any active access keys that have been unused for more than a year.

Deactivating or deleting unused access keys improves security.

+ Add another user

Select AWS access type

Select how these users will primarily access AWS. If you choose only programmatic access, it does NOT prevent users from accessing the console using an assumed role. Access keys and autogenerated passwords are provided in the last step. [Learn more](#)

Select AWS credential type*

☐ Access key - Programmatic access

Enables an **access key ID** and **secret access key** for the AWS API, CLI, SDK, and other development tools.

☒ Password - AWS Management Console access

Enables a **password** that allows users to sign-in to the AWS Management Console.

Console password*

☐ Autogenerated password

☒ Custom password
